### How to remove the "Live Share" and Feedback button to reclaim the toolbar space?

<https://i.imgur.com/amQ2dnm.png>

Even when I hid all the toolbars, the space is still not reclaimed because of the two buttons are taking the row. Can I remove them as well as the empty row?

PS: In the Installer, unchecking "Live Share" removed that icon, but the Feedback icon is still there even after I chose "No, I would not want like to precipitate". That is that one small useless icon is taking up an entire row of my wide monitor...
