Features

A Snippet editor integrated inside of the IDE which supports C#, Visual Basic, JavaScript, HTML, XML and SQL.

- Access it by opening any .snippet file or going to File -> New -> File -> Code Snippet File
It uses the native Visual Studio code editor so that you can write the snippets in the same environment you write your code.
- It lets you easily mark replacements by a convenient right click menu.
- It displays properties of the snippet inside the Visual Studio properties window.

A Snippet Explorer tool window to search snippets on your computer

- It is located under View -> Other Windows -> Snippet Explorer
- This tool window contains a code preview window which lets to peek inside the snippet to see what it is without opening the file.
- Maintains an index of snippets on your computer for quick searching.
- Provides a quick way to find a code snippet to use, edit or delete

A right Click "Export as Snippet" menu option added to C#, VB, JavaScript, HTML, SQL and XML code editor to send highlighted code directly to the Snippet Editor
